Located in south of Los Angeles, we launched our company in response to the demand of small to medium size businesses that are tough to get qualified to traditional financing options.

We provided our first loan to a franchised flower shop in Tustin, CA. The owner needed to stock more inventory for upcoming Valentine's Day and accept more orders. The owner was able to maximize the sales in February which also allows to keep up with the business during the slow season. It was the first of many BrightPoint success stories.
